

EXPERIENCE

TheNewBoston | Full Stack Developer

Nov 2020 - Present

- Helping to build the world's fastest, most reliable, and secure digital currency blockchain network.
- React (Typescript)
- Python
- HTML, CSS, JavaScript
- Discord.js

GAOTek Inc. | Lead Software Engineer Intern Jan 2020 – Apr 2020

- Designed and Developed an Excel Amazon product listing generator.
- The excel product generator reduced product deployment time by 30%
- The application was built using PHP, HTML, CSS, JavaScript, Linux, Composer, and Laravel.
- I also helped with designing and developing the company's website as well as the SEO and digital marketing part of the company as well.

NESB | Full Stack Developer Jan 2016 – Present

- Helped reduce the costs of running the company's ecommerce store by rebuilding the whole store and reducing the codebase.
- Technologies used: HTML, CSS, JavaScript, PHP, MySQL
- Improved SEO by 60% after rebuilding the website.
- Did photo editing using adobe photoshop for some of the images and website graphics.

Upwork | Software Engineer Jan 2017 – Jan 2018

- At Upwork, I mostly did Front End Development with HTML, CSS, & JavaScript
- Did a lot of PSD to HTML Conversions.
- Worked with companies such as BrideBook and Cool Gigs

PROJECTS

📍 NESB | Ecommerce Store

- **Technologies used:** HTML, CSS, JavaScript, PHP, MySQL
- Improved SEO and Best Practices ranking by 60% on Google's Lighthouse tool by rebuilding the website and optimizing the codebase.

📍 Covid-19 Insights | Web Application

- **Technologies used:** HTML, CSS, JavaScript, React, Chart.js
- Users can click on their country and see the number of cases, recovered cases, and deaths.
- Uses mapbox to visualize all the covid-19 "Hotspots"
- Shows other things like the recovery rate, fatality rate, and number of cases outside of China.
